

Answer **at least one** of the following questions (in 5-7 sentences) and be ready to discuss all of them in class. You will **not** receive extra credit for answering more than one question.

1. (*From Ground Rules for Discussions*) Do you agree or disagree with the provided rules? Explain your answer. Are there any rules you would like to have for our class discussions that are not listed?

2. (*From What is Ethics?*) Did this article change your perception of what ethics is or is not? After reading it, how would you define ethics? In a general sense, what kinds of ethical questions do you think would be most applicable to a class on ethics in technology? Specifically, one on artificial intelligence and machine learning?
